Quadratic Formula

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Solve using the quadratic formula.

1. $4p(p + 1) = 1$

2. $3x^2 + 1 = 6x$

3. $(x - 4)(x + 3) = 8$

4. $-7r^2 = 5r + 3$

5. $t^2 - 2t + 3 = 0$
